

## **DEAD, DISEASED OR LEANING TREES**

The tree work for 2006 has been completed. We began with trees that posed a threat to property and dead trees in the Clubhouse area. Trees identified as such were examined by an arborist and James City County Engineer Wayland Bass. They were dropped, cut and the wood was neatly stacked. If you have a tree you would like considered for possible removal in 2007 please contact Cindy Renault @ United Property.
